Data Security Assessment

Achieve a clear understanding of the storage, access and protection of one of your organisation’s most valuable assets.

At Quorum Cyber, we pride ourselves on staying ahead of the threats of tomorrow and helping to defend our customers from known and emerging threats. We believe that they don’t only originate from outside an organisation—they can come from inside too.

In today’s digital world, data is one of the most valuable assets for any organisation. We’ve developed our Data Security Assessment to help you protect all your data and manage every aspect of it throughout its lifecycle.

This comprehensive assessment will provide you with a clear understanding of your data security posture, including data storage, access and protection.

By the end of the engagement you’ll understand the precise location of your business’s most sensitive data, from your crown jewels to your source code.

We’ll share recommendations for protecting it from exfiltration.

According to cyber insurer Beazley, 65% of its cyber extortion incidents involved exfiltration in the first quarter of 2022.

Customer Benefits

What you will achieve:

**Protect sensitive data**
- Uncover hidden risks that may be compromising your data security
- Assess your environment against key elements within the data protection baseline to improve your data security posture

**Prevent data loss**
- Learn about the tools and services that can mitigate risk to keep your data secure
- Explore recommendations and next steps

**Gain contextual user insights**
- Monitor contextual user insights, risk profiles and behaviours to gain a better understanding of who has access to your data and how it is being used

What you will receive:

1. **Executive Summary**
   highlighting the key points of the Data Security Assessment

2. **Data Security Assessment report**
   describing your data security posture and how it compares to industry standards

3. **Recommendations**
   for improving your data security posture and mitigating risk, such as non-intrusive policies for your workforce to dynamically apply controls

4. **A roadmap**
   for implementing our recommendations

5. **Access to our Advisory Services team**
   for support and advice as you implement the recommendations

**Eligibility for funding**

If you wish, prior to the assessment, we can check if you’re eligible for an initial fully-funded engagement, which will be at no cost to you.
